

SOLUTIONS FOR BETTER HEALTHCARE

Being an internationally active company, GMS has access to an excellent network of partner companies and leading manufacturers in the industry.

Leipzig, city center

Leipzig, GMS GmbH headquarters

Since more than 20 years, our company has been specializing in offering high-quality products and services in the field of healthcare/medical technology. The focus of our commercial activities lies in the countries of the Middle East and North Africa region (MENA region). GMS is currently represented with offices in Egypt, Iraq and Yemen.

Being an internationally active company, we focus on the highest German sector standards when it comes to realizing complex projects. We are motivated by quality, reliability and integrity in order to turn the challenging goals of our customers into reality.

Our team, which is made up of highly qualified staff, has the expertise needed in medical technology and healthcare management, as well as in all relevant management areas.

From technicians, engineers and project managers through to corporate management, we share the passion for realizing complex healthcare projects to the highest quality standard, from planning through to delivery to the customer.

-  **GMS German Medical Solutions Leipzig, Germany**
-  **Offices in Egypt, Iraq and Yemen**

Our services range from planning to the realization of complex projects for hospitals and other healthcare facilities. We also offer professional services that cover all hospital requirements, and provide top-quality medical technology products.

TURN-KEY-PROJECTS

GMS assumes overall responsibility as the general contractor - from the first draft designs, to the planning and construction phase, to the complete equipment of the hospital with the latest medical technology and interior furnishings.

MEDICAL PLANNING AND DESIGN

Depending on the specific requirements, the planning process conducted by GMS comprises the following modules: needs analysis, evaluation and selection of the best design, construction planning, function planning, medical technology room planning, coordination of architects, engineers and technical teams, as well as integrated project management.

HOSPITAL EQUIPMENT

GMS supports the installation and correct commissioning on site, together with the manufacturers, ensuring that all equipment functions correctly.

MOBILE HOSPITALS

GMS offers modular structured mobile hospitals with the related services. They are often a highly suitable solution, particularly in places where medical aid is needed most urgently beyond the existing infrastructure. Despite the comparatively small space available, all the necessary equipment for diagnosis and medical treatment, including surgical procedures, can be easily integrated.

MAINTENANCE AND SERVICE

This already begins with the management of the guarantee contracts in close cooperating with the manufacturers in question, and then extends across the entire life cycle of the appliances and equipment. Our service and maintenance teams are often located directly in the respective hospitals, ensuring proximity to customers and service availability around the clock.

MEDICAL CONSUMABLES

GMS provides the products and services urgently required in the field of orthopaedics, prosthetics and various specialist surgical fields.
